

Year group: 4

Term 6

Key drivers –
Independent
learning,
determination,
perseverance

English

We begin the term by delving back into narrative writing with a focus on historical settings. We will then move on to look at poetry and language play. We have previously explored limericks and now we will have a look at riddles, puns and nonsense verse. Our class story this term is 'Anglo-Saxon Boy' by Tony Bradman.

Maths

This term we will be focussing on completing our journey with decimals and money. In addition to this, we will also cover time, statistics, shape and geometry. We have been learning our times tables throughout the year and we will be taking our tables check this term.

History

Our big question this term is how did the Anglo-Saxons and Scots invasions change life in Britain? To answer this we will be discovering why the Anglo Saxons invaded and settled, what life was like, how they lived and much more. We will also draw upon our past topic 'The Romans' to make sensible and informed judgements.

I Predict a Riot! The Anglo Saxons

This term we will be exploring the Anglo Saxons and their invasion of Britain in the 5th and 6th centuries.

ICT – In ICT, we shall be learning about programming in games. This follows on from last terms learning where we were learning how to type basic code.

ART

In art, we shall be studying the intricate illuminated lettering created by the Anglo Saxons. We will take influence from their style to create our own unique illuminated lettering.

Science

This term we will be studying teeth and digestion. We will be labelling the digestive system and discovering what each of our organs does with the food that we eat. We will also be taking a close look at our teeth, their functions and how to look after them.

Music – Rewind and Reflect.

P.E – OAA and Athletics.

Languages – Spanish.

R.E – Does the language of scripture matter?
